# 2.4GHz/5GHz 300Mbps Outdoor CPE

Pharos CPE Series Datasheet

Highlights

-Wireless N speed up to 300Mbps

-Selectable bandwidth of 5/10/20/40MHz

-Adjustable transmission power by 1dBm

-Broad operating frequency channels ensure less wireless interference

-Built-in 2×2 dual-polarized directional MIMO antenna

-Passive PoE Adapter supports up to 60 meter (200 feet) Power over Ethernet deployment

-1 10/100Mbps Ethernet port for passive PoE (all CPE products) and 1 10/100Mbps Ethernet port for extended applications (CPE220/CPE520)

-TP-Link Pharos MAXtream (Time-Division-Multiple-Access) technology improves product throughput, capacity and latency performance, ideal for PtMP applications

-Centralized Management System – Pharos Control

Typical Applications

TP-Link's Outdoor CPE is dedicated to reliable solutions for outdoor wireless networking applications. With its centralized management application, it is flexible and ideal for point-to-point and point-to-multipoint applications.
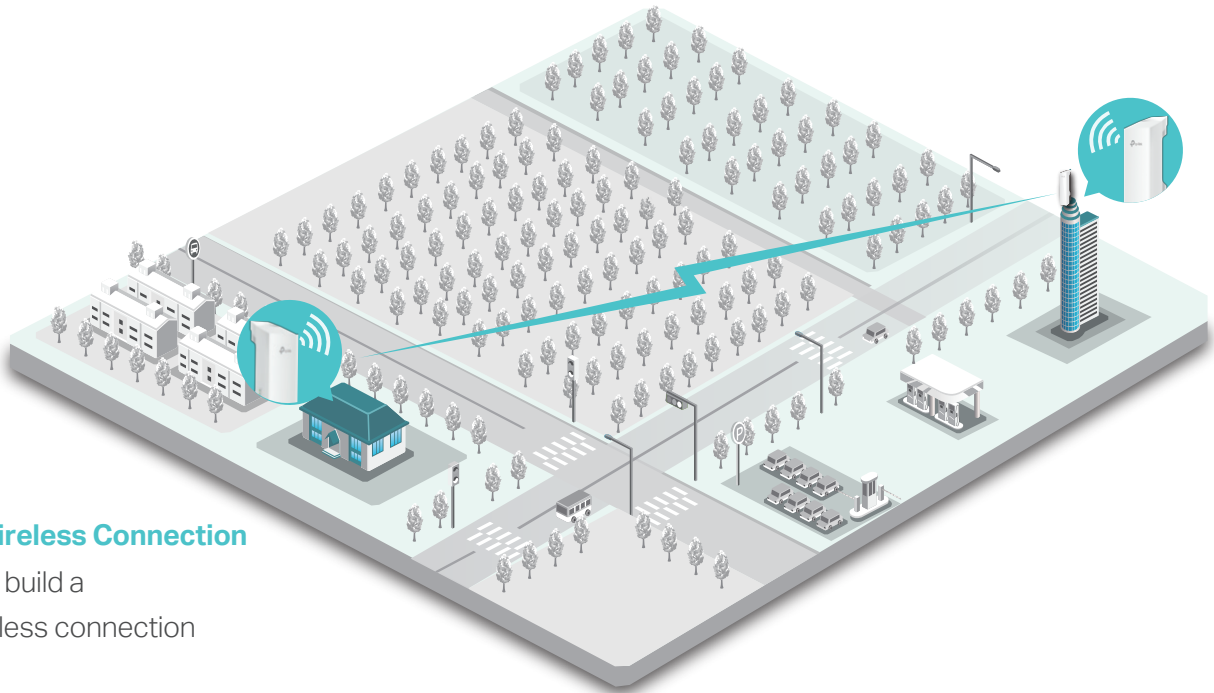

- **Long-distance Wireless Connection**
  Using two CPEs to build a
 long-distance wireless connection
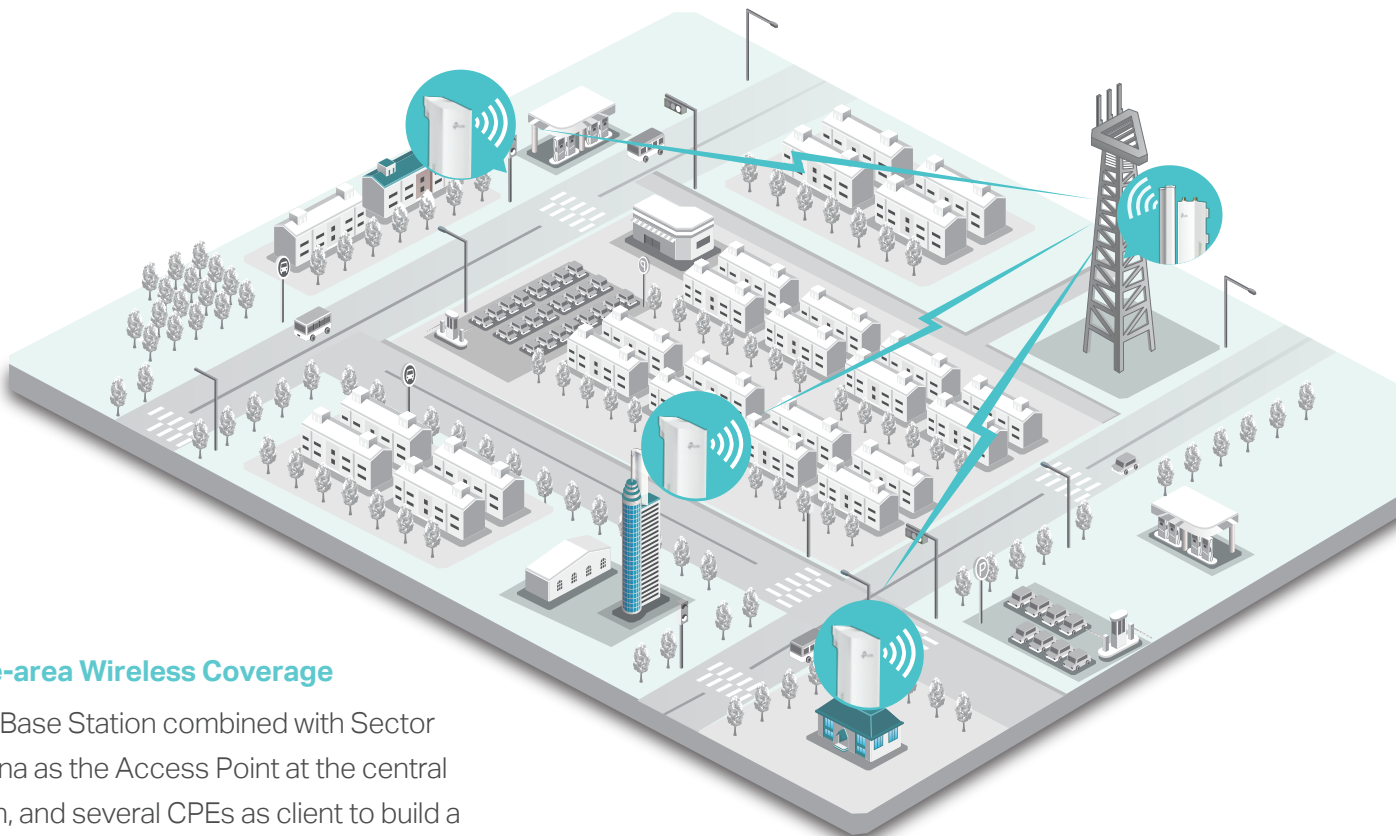

- **Large-area Wireless Coverage**
  Using Base Station combined with Sector
  Antenna as the Access Point at the central
  station, and several CPEs as client to build a
  Point to Multi-Point coverage.

TP-Link MAXtream TDMA Technology

As network scale increases, wireless competition and collisions among outdoor devices will be so fierce that the real throughput of the network will drop, resulting in a serious impact on end-user experience, to mitigate these effects, TP-Link's Pharos series uses MAXtream TDMA Technology.

* Real throughput depends on the actual application environment.

Pharos Control – Centralized Management System

Pharos also comes equipped with centralized management software that helps users easily manage all the devices in their network from a single PC - Pharos Control. Functions like device discovery, status monitoring, firmware upgrading, and network maintenance can be managed using Pharos Control.
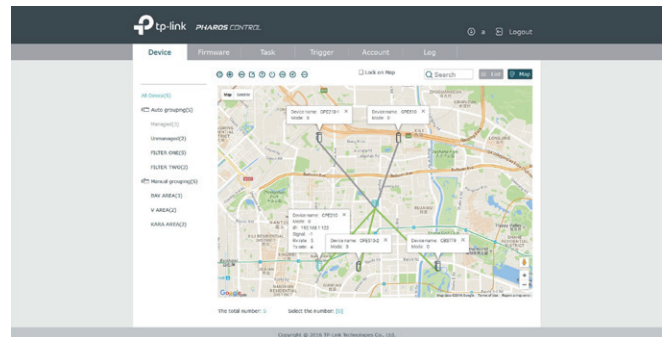

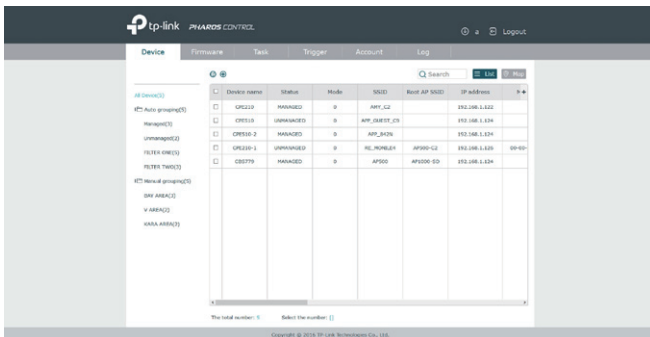

PharOS

User-friendly web-based management system allows professionals to do more specific configurations.
