Power Notice

1. The device is a power-required device, meaning, it will not work till it is powered. If your networks should be active all the time, please consider using UPS (Uninterrupted Power Supply) for your device. It will prevent you from network data loss or network downtime.
2. In some area, installing a surge suppression device may also help to protect your Fast Ethernet Switch from being damaged by unregulated surge or current to the Switch or the power adapter.

6. Installing the Switch

This part describes how to install your Fast Ethernet Switch and make connections to it. Please read the following topics and perform the procedures in the order being presented.

Note This Fast Ethernet Switch does not need software configuration.

Desktop Installation

To install the Fast Ethernet Switch on desktop, simply follow the following steps:

Step 1: Attach the rubber feet to the recessed areas on the bottom of the Fast Ethernet Switch.

Step 2: Place the Fast Ethernet Switch on desktop near an AC power source.

Step 3: Keep enough ventilation space between the Fast Ethernet Switch and the surrounding objects.

Step 4: Connect your Fast Ethernet Switch to network devices.

    A. Connect one end of a standard network cable to the 10/100 RJ-45 ports on the front of the Fast Ethernet Switch.

    B. Connect the other end of the cable to the network devices such as printer servers, workstations or routers, etc.

Step 5: Supply power to the Fast Ethernet Switch.

    A. Connect one end of the power cable to the Fast Ethernet Switch.

    B. Connect the power plug of the power cable to a standard wall outlet.

When the Fast Ethernet Switch receives power, the Power LED should remain solid Green.

Rack Mounting

To install the Fast Ethernet Switch in a 19-inch standard rack, follow the instructions described below.

Step 1: Place your Fast Ethernet Switch on a hard flat surface, with the front panel positioned towards your front side.

Step 2: Attach a rack-mount bracket to each side of the Switch with supplied screws attached to the package. Figure **4** shows how to attach brackets to one side of the Fast Ethernet Switch.
Figure 4: Attach the brackets to the Fast Ethernet Switch

> ⚠️ **Caution**
> You must use the screws supplied with the mounting brackets. Damage caused to the parts by using incorrect screws would invalidate your warranty.

Step 3: Secure the brackets tightly.

Step 4: Follow the same steps to attach the second bracket to the opposite side.

Step 5: After the brackets are attached to the Fast Ethernet Switch, use suitable screws to securely attach the brackets to the rack, as shown in Figure **5**.
